

MAKING OBSCAPE SOLUTIONS TRULY SEAMLESS

Obscape aims to make real-time environmental monitoring as accessible and user-friendly as possible. Our Global SIM solution is the missing link to giving you a plug & play experience with your Obscape devices.

While cellular connectivity offers a very good balance between transmission costs and availability across all continents, it requires a SIM card to get access to the local network at your deployment location. The need for the user to source a SIM card used to be the only aspect that kept Obscape equipment from being truly seamless.

Therefore, we have partnered with a Global SIM provider to cover that one missing link. By pairing your Obscape device with a Global SIM card, you're able to connect to 682 different networks across virtually all countries of the world at very affordable rates. Management of the SIM card is conveniently integrated into the Obscape Data Portal.

KEY FEATURES

- Global cellular connectivity
- Access to 682 networks across the globe
- Very affordable rates
- 4G, 3G and 2G enabled
- SIM management through Obscape Data Portal

COVERAGE

Obscape's Global SIM provider has roaming agreements with 682 networks across the globe. Virtually all countries are represented, notable exceptions being Syria, Liberia, Benin, Angola and Libya (refer to map on next page).

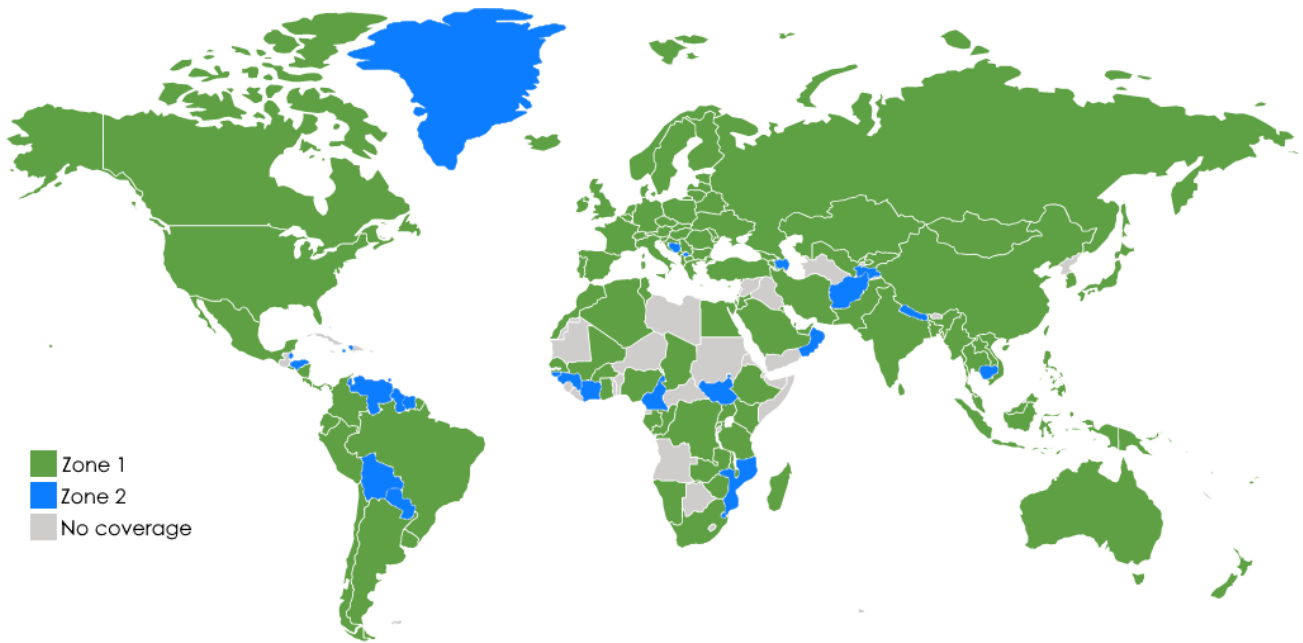

One special roaming partner in the network is Tampnet. It maintains a **4G network across the North Sea and in the northern regions of the Gulf of Mexico**. This provides Obscape's Global SIM users a unique opportunity to connect their offshore Obscape buoys to 4G instead of the satellite network and save significantly on transmission costs. [Check out the coverage maps here.](#)

PRICING STRUCTURE

Credit for your Global SIM card is purchased upfront in batches of €100, which is typically sufficient for a period of 1 to 12 years of non-stop operation (see Monthly Rates section for details). At the end of every month, your actual usage is subtracted from the credit. By the time you run out of credit, the next batch can be purchased.

MONTHLY RATES

Monthly rates vary based on bundle size and zone. All countries covered by the network¹ are divided into 2 zones, Zone 1 and Zone 2. Zone 2 includes a limited number of countries², while all other countries are included in Zone 1. Several bundle sizes are available to cover the different message sizes and posting frequencies of Obscape devices:

- 20 MB bundle. For example:
 - Obscape Wave Buoy
- 50 MB bundle. For example:
 - Obscape Rain Gauge
 - Obscape Weather Station
 - Obscape Level Gauge
- 200 MB bundle.
- 250 MB bundle. For example:
 - Obscape Wave Buoy with real-time displacement timeseries
- 500 MB bundle. For example:
 - Obscape Time-Lapse Camera

¹ Countries **not** covered by the Global SIM network: Andorra, Angola, Antigua And Barbuda, Bahamas, Barbados, Benin, Bermuda, Bhutan, Botswana, Burundi, Cayman Islands, Central African Republic, Comoros, Cuba, Djibouti, Dominica, Dominican Republic, Eritrea, Equatorial Guinea, Falkland Islands, French Polynesia, Guadeloupe, Gambia, Grenada, Guam, Guatemala, Iraq, Jamaica, Kiribati, Lebanon, Lesotho, Liberia, Maldives, Mauritania, Montserrat, New Caledonia, Niger, North Korea, Puerto Rico, Saint Lucia, Sao Tome And Principe, Seychelles, Sierra Leone, Somalia, Saint Kitts And Nevis, Somaliland, Sudan, Syria, Timor-Leste, Togo, Turkmenistan, Turks And Caicos Islands, Yemen, Cape Verde, Libyan Arab Jamahiriyah, Saint Vincent And Grenadines, Western Sahara

² Zone 2 countries: Afghanistan, Anguilla, Aruba, Azerbaijan, Belize, Bolivia, Bonaire, Bosnia And Herzegovina, Brunei Darussalam, Cambodia, Cameroon, Swaziland, French Guiana, Greenland, Guinea, Guinea-Bissau, Guyana, Haiti, Honduras, Kosovo, Mauritius, Monaco, Mozambique, Nepal, Oman, Paraguay, Sint Maarten (Dutch part), Solomon Islands, South Sudan, Suriname, Tajikistan, Trinidad And Tobago, Venezuela, Aland Islands, Virgin Islands, British, Cote D'Ivoire, Isle Of Man

Monthly fees per zone and bundle are presented in the table below.

	ZONE 1	ZONE 2
20 MB	€ 0.65	€ 1.30
50 MB	€ 0.90	€ 2.60
200 MB	€ 4.70	n/a
250 MB	€ 5.00	n/a
500 MB	€ 7.50	n/a

SIM MANAGEMENT

Every Global SIM supports all available bundle sizes and zones. Bundle size and zone for a particular SIM can be selected through the Obscape Data Portal and changed at any time.

Furthermore, SIM cards can be deactivated and (re)activated dynamically through the portal, allowing you to halt the monthly fees during periods when your device or SIM is idle.

Finally, your credit balance and monthly consumption can be viewed at any time through the Data Portal.
